

School Website Development Proposal

Date: 08 January 2026

Executive Summary

This proposal outlines the development of a modern, comprehensive website for Pine Wood English Medium School that will serve as the primary digital platform for students, parents, faculty, and the community. The solution combines professional design with robust functionality to streamline communication, enhance administrative efficiency, and showcase institutional excellence.

Project Investment: ₹10,000

Timeline: 12-14 weeks

Deliverables: Responsive website + Parent & Student Portals

1. Project Objectives

- Establish a professional digital presence reflecting institutional values and academic standards
- Streamline administrative processes through automated systems and self-service portals
- Enhance communication between administration, faculty, parents, and students
- Improve transparency regarding academics, admissions, and finances
- Showcase achievements, infrastructure, and extracurricular programs

Success Metrics:

- 40% reduction in administrative inquiries
- 80% parent portal adoption within 6 months
- Page load time under 3 seconds
- 95+ mobile performance score

2. Website Structure & Features

2.1 Public Website

Home Page: Dynamic carousel, quick links (Calendar, Fee Payment, Results), news ticker, Principal's message, statistics banner, testimonials

About Us: History, mission/vision, leadership profiles, infrastructure gallery, accreditations

Academics: Curriculum details, department information, interactive academic calendar, faculty directory

Admissions: Step-by-step process, online inquiry form, transparent fee structure, scholarship information, FAQs

Student Life: Extracurricular clubs, sports programs, house system, student council

Resources: Photo/video galleries, downloads centre (forms, syllabi, newsletters), school blog

Contact: Complete contact details, embedded Google Maps, inquiry form, grievance submission

3. Technical Specifications

Platform: WordPress with custom theme OR modern framework (React/Next.js + Laravel/Node.js backend)

Hosting: Cloud-based (AWS/Google Cloud) with 99.9% uptime, SSL certification, automated daily backups

Design:

- Mobile-first responsive design (320px to 4K screens)
- WCAG 2.1 Level AA accessibility compliance
- Optimised performance (lazy loading, minified code, CDN integration)
- Cross-browser compatible

Security:

- SSL encryption, secure payment gateway (PCI DSS compliant)
- Protection against SQL injection, XSS, and CSRF attacks
- Role-based access control, session timeouts
- Regular security audits

Integrations:

- Payment gateways (Razorpay, PayPal, Stripe)
- Google Analytics, Maps, reCAPTCHA
- Social media feeds (Facebook, Instagram, YouTube)
- Email marketing (Mailchimp/SendGrid)
- SMS gateway for alerts

SEO Features:

- Keyword optimization for local searches
- Schema markup, XML sitemap
- Meta tags optimisation
- Mobile-friendliness and speed optimisation

4. Project Timeline
